*You Dream it.  We Build it...*

[www.infinitemedi.com](http://www.infinitemedi.com)

## Who we are.

- ▶ ONE SINGLE PLATFORM offering all medical products and innovative healthcare solutions.
- ▶ High Quality & pocket friendly: Quality is not spending more money. With the right design and efficient approach, we can provide excellent results with minimum costs.
- ▶ Super-Efficient Team - We use strategies, tactics, and tools to manage the design and construction process. We achieve this by investing time and effort on customizing the design according to standards and the client's specific project needs.

## What we Provide

- ▶ Construction Project Management.
- ▶ Designing and Planning Healthcare Spaces
- ▶ Strategic Planning and Procurement of Medical Equipment
- ▶ Establishing Functional Laboratories and Pharmacies
- ▶ Ensuring Quality through Accreditation Management
- ▶ Audit Management
- ▶ Promoting Employee Wellness through Corporate Health Camps
- ▶ Gaining Insights and Making Informed Decisions with Market Surveys and Reports (DPR)

## Why Infinite Medi:

- ▶ More value for our customers with fewer resources.
- ▶ Expert Team with knowledge to deliver true needs, provide accurate advice, and offer excellent solutions.
- ▶ Adherence to LEAN Project Delivery methodology, thus Maximizing customer value while minimizing waste
- ▶ Empowering project participants with information.

## What We Believe

Trust is the single most essential element to our ability to deliver extraordinary results.

# Wings of Infiniti Medi: Construction Project Management.

## TO ACHIEVE SUCCESSFUL PROJECT DELIVERY

It is crucial to have effective management systems in place. These systems help control changes in important areas like scope, schedule, budget, resources, and risk, with the goal of optimizing quality and the overall investment.

## Designing and Planning Healthcare Spaces

- ▶ Expertise in designing and constructing
- ▶ Critical Care and Surgical Areas
- ▶ Specialized in developing new healthcare facilities and redesigning existing ones
- ▶ Designing and planning healthcare spaces for critical areas such as Medical
- ▶ Oxygen, Intensive Care Units (ICUs), CSSD and others.
- ▶ Other high-acuity areas is a complex and vital task that requires careful consideration of various factors to ensure patient safety, efficient workflow, and optimal functionality.

## Strategic Planning and Procurement of Medical Equipment

- ▶ Specialized in medical equipment procurement.
- ▶ Expertise in clinical needs, budgeting, architecture, and building aspects.
- ▶ Thoroughly evaluate and select products suitable for purpose, budget, and project timeline.

**Goal:** Provide cost-effective and well-planned information, adhering to policies to avoid pitfalls and ensure successful outcomes.

Focus on achieving timely, budget-friendly, and purposeful medical equipment procurement results.

## Establishing Functional Laboratories and Pharmacies

- ▶ Comprehensive support for establishing medical diagnostic centers.

### Services include:

- ▶ Planning the lab's scope of work.
- ▶ Creating a list of diagnostic lab equipment.
- ▶ Ensuring legal compliance.
- ▶ Staffing and infrastructure planning.
- ▶ After-sales support, including maintenance and calibration of equipment.
- ▶ Assistance in implementing Standard Operating Procedures (SOPs).
- ▶ Staff training to streamline processes and meet accreditation requirements (e.g., NABL).

## Ensuring Quality through Accreditation Management

- ▶ Accreditation ensures the highest healthcare quality and boosts patient confidence in your services.
- ▶ Navigating accreditation requirements can be expensive and time-consuming, diverting focus from patient care.
- ▶ Our organization specializes in accreditation and manages the entire process for you.
- ▶ We handle policy development, workflow efficiency, training, and evidence-based documentation to meet standards like **NABH or NABL**.

## Audit Management

- ▶ Audit management oversees and coordinates audits within the organization.
- ▶ It involves planning, executing, and evaluating audits to ensure compliance with internal policies, regulations, and standards.
- ▶ The goal is to promote transparency, accountability, and efficiency in the organization.
- ▶ Audit management helps identify areas for improvement and risk mitigation.

## Promoting Employee Wellness through Corporate Health Camps

Promoting employee wellness through corporate health camps offers numerous benefits to both employees and the organization. By focusing on employee wellness through these camps, organizations can foster a healthier and happier workforce, resulting in increased productivity, lower healthcare costs, and overall improved performance. Few services like below:

### Pre-employment Checkups

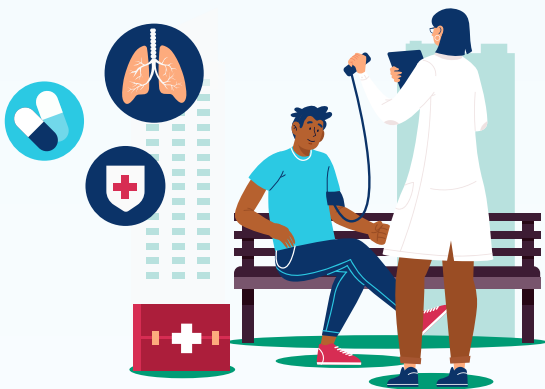

Ensure your prospective employees are healthy and fit.

### Health & Wellness Programs

Reward your Employees with a Customized Health & Wellness Program

### Doctor Counselling

Round the clock helpline for all your and employees' medical urgencies.

### Customized Health Packages

Custom-made packages that suit all body types and all age groups.

### Occupational Health Services

Ensure workforce safety & security at the workplace

### DPR:(Detailed Project Reports):

- ▶ A Detailed Project Report (DPR) with SWOT analysis is a comprehensive document about a project.
- ▶ It presents essential project information in an easily understandable manner.
- ▶ The report includes a SWOT analysis, which assesses the project's strengths, weaknesses, opportunities, and threats.
- ▶ Decision-makers use the report to grasp the project's potential and foresee potential challenges.
- ▶ The DPR with SWOT analysis aids in making well-informed decisions and planning for the project's success.

### Worth of us:

**Within Budget:** Our cost-effective solutions strike a balance between initial capital outlay and long-term life cycle costs.

**Added Value:** Our approach often leads to significant savings in maintenance expenses that outweigh our fees.

One benefit of this setup, called a “stepped wedge trial,” is that it doesn’t relegate one block of individuals into a control group that goes without training for the duration of the study.

**DID YOU  
KNOW?**

Each healthcare facility is unique, and the design process should be tailored to its specific requirements. Regularly review and update the design plans based on feedback and real-world usage to improve patient outcomes and staff efficiency.

**We thank you for your time and trust  
in us. Welcome on-board !!**
